

Redesigning the [Smoke Signals Community](#)

...has been our goal over the last month.
And we've just about got it finished.

[You can read more about it at the site itself](#) -

but here's a summary of the big changes:

- easier to understand, easier to navigate.
- no registration needed to participate on the messageboards.
- the messageboards and the latest smoking fetish news are right on the front page.
- Smoke Signals Magazine now available to everyone, for free, on the Community site.
- other community/networking tools such as photo and video sharing, friending and messaging, etc. still easily available for those who want them.

We've tried to make the changes that you've told us were needed, and think we've got a much better site as a result. We hope you'll check out the redesign and let us know what you think. 🍷
